## **Part 4**

User test

## **Part 5**

Final design

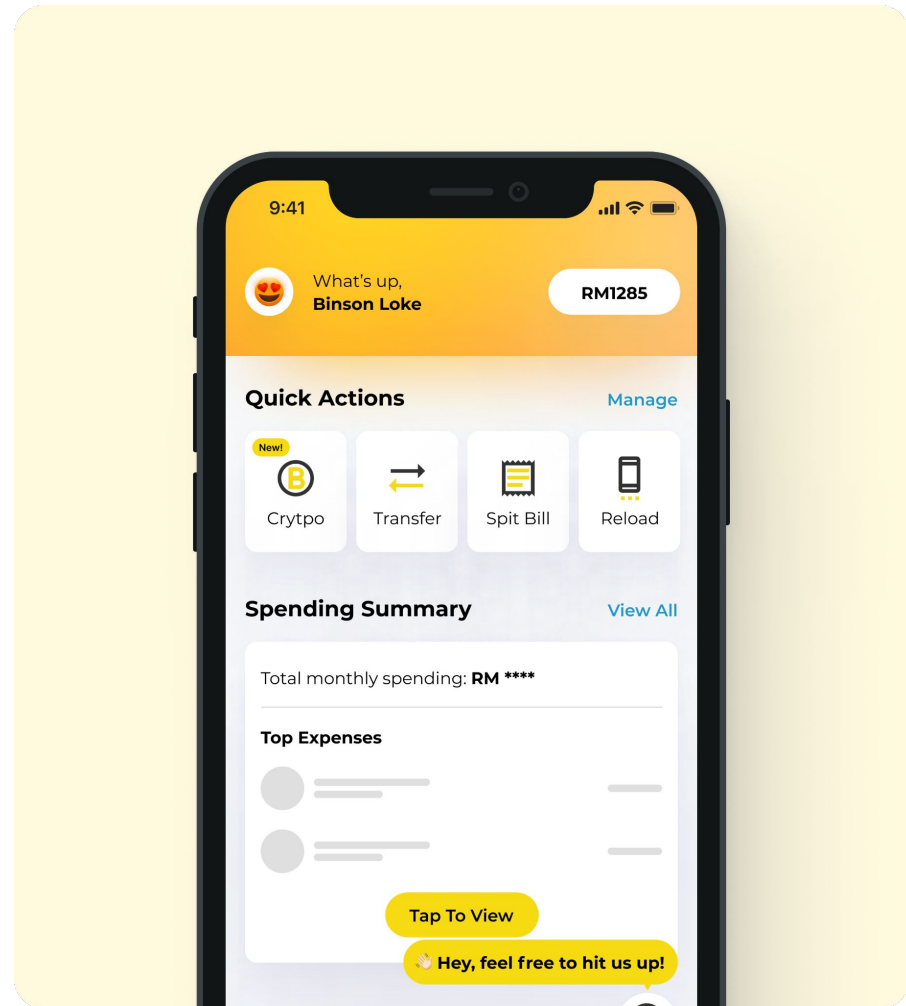

Part One

# Research

## The Problem

# Reimagine The Digital Banking Experience For Gen-Z

04/28

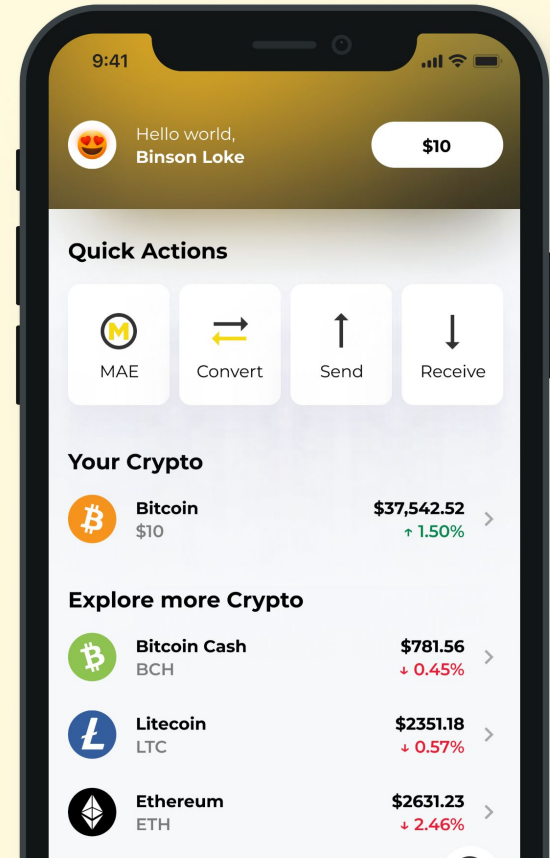

## The Problem Statement

# Problem Statement

Gen Z is concerned about money, but they **lack financial services product adoption** and often **overspending**. Hence, there's a ripe opportunity for Maybank to engage these customers.

To attract Gen Z, Maybank must develop **engaging, tech-driven, and educational** products/features that offer value.

## The Goals

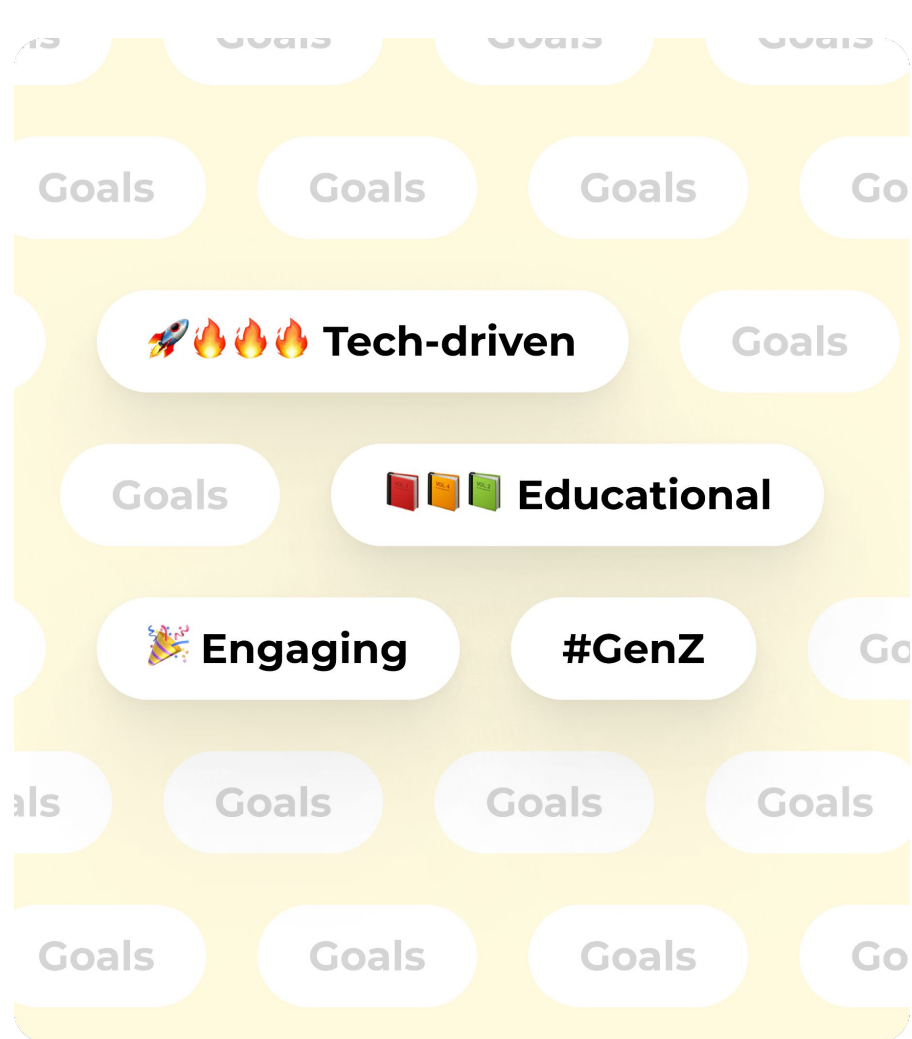

# Goals

### Project goals:

How do we create a **tech-driven, engaging, and educational** banking experience for Gen Z?

### Business goals:

How do we increase the **transaction value and frequency**?

# Users Insights

## Early adopter

Gen Z open to a wider variety of financial service products than other generations.

## Lack of financial adoption

Gen Z is lacking financial services product adoption such as blockchain, IoT, etc.

## Irresponsible spendthrift

Gen Z isn't responsible for the bulk of their own spending.

# Design Principles

## Tech-driven

Design banking technology for the future.

## Engaging experience

Build features that provide delightful experiences.

## Educational

Gen Z is concerned about money, so teaching them basic financial literacy skills can help build relationships.

## The Proposed Action

# Early Adopter

Using **AI** to enhance user identification while also mimicking live employees through **chatbots**.

### Pros:

Offer the **greatest cost savings** opportunity and build a deeper emotional **connection with users**.

### Business impacts on the app:

Increase **time spent** on the app, increase **customer advocacy**, and reduce **churn rates**.

## The Proposed Action

# Financial Adoption

Introducing blockchain technology/services in hopes of streamlining processes.

### Pros:

Bringing greater **efficiency** and **transparency**.

### Business impacts on the app:

Increase **transaction value** and **frequency**.

## The Proposed Action

# Educational

Become synonymous with free education (not the boring kind).

### Pros:

Gain trust with users.

### Business impacts on the app:

Increase **time spent** on the app and increase **active users**.

Part Two

**Ideate**

## The Ugly Sketches

# Sketches

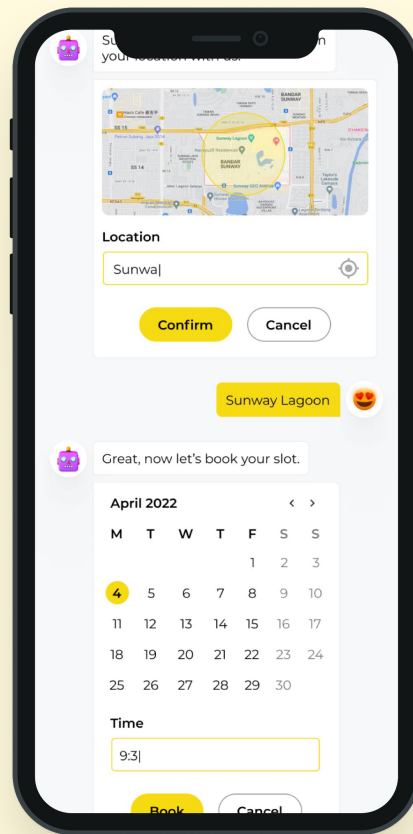

The secret recipes

## The User Flows

# AI Chatbot

1. Open the app
2. Have a problem
3. Click on the chatbot
4. Describe the problem
5. Close the chatbot

## The User Flows

# Blockchain Technology

### 1. Open the app

Users will toggle the Crypto page from the MAE home page

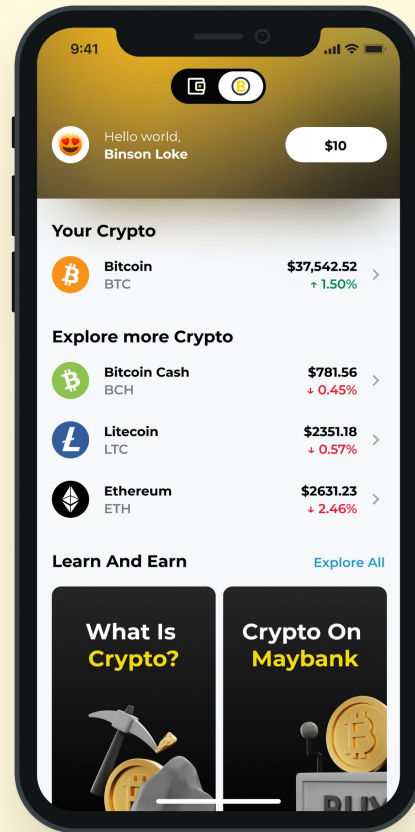

### 2. Explore a Crypto

### 3. Select a preferred Crypto

### 4. Buy/sell and input a preferred amount

The current prices will be shown here

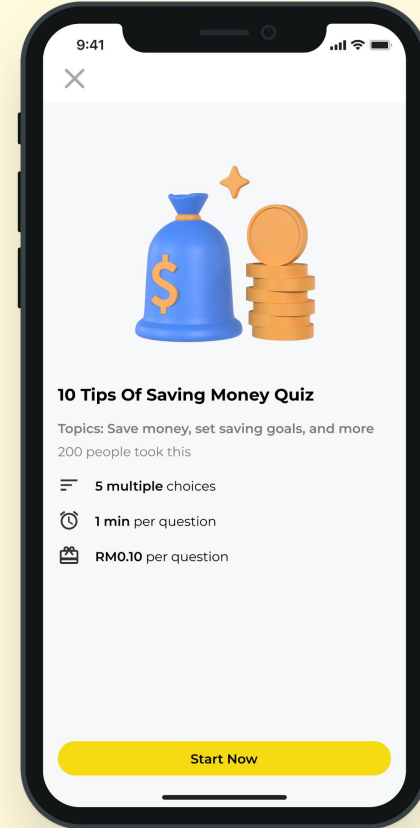

### 5. Share the happiness (optional)

## The User Flows

# Educational Content

1. Open the app
2. Select an Educational Content
3. Explore the content and take the quiz  
Users can earn incentive per question
4. Close the quiz
5. Share the happiness (optional)

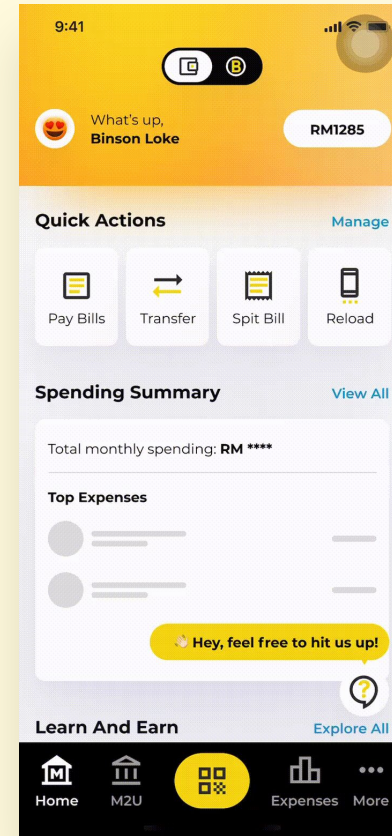

Part Three

# Design Approach

## The Prototype

# AI Chatbot

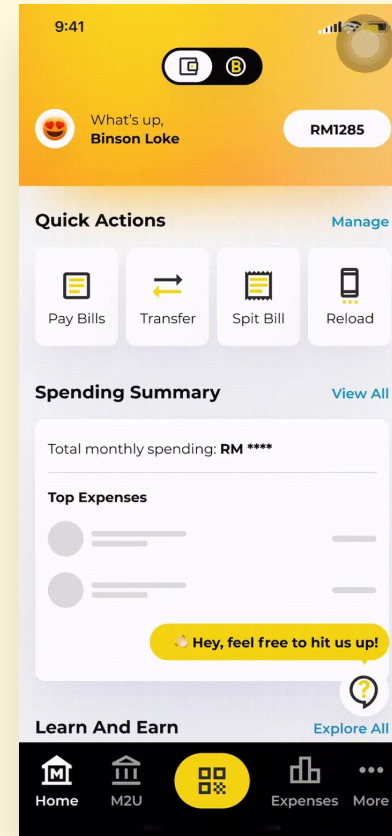

Conversational banking helps banks deliver a **great customer experience** at scale. It keeps things **seamless**.

## The Prototype

# Blockchain Technology

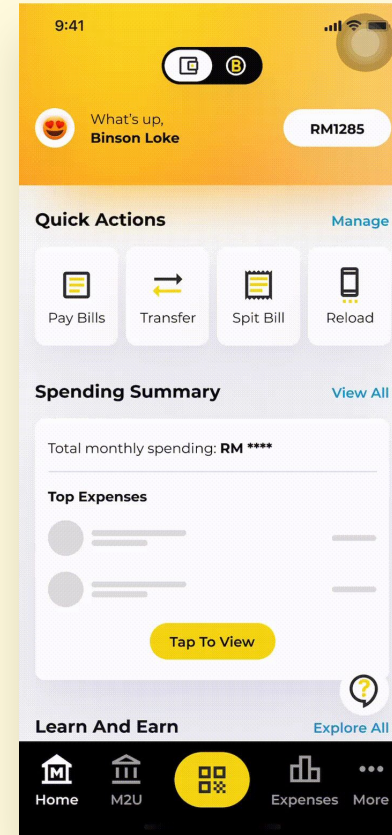

Intelligence survey found that 66% of Gen Z believe new technologies like **blockchain** will have the greatest impact on banking by 2025.

## The Prototype

# Educational Content

Gen Z is concerned about money, so **teaching them financial literacy skills** with little **incentive** can motivate them and build relationships.

Part Four

# User Test

# Findings

## Crypto entrypoint

"I barely notice the toggle that located at the top."

## Crypto actions

"As a user, I want to convert, send, receive my Cryptocurrency to someone."

## Skip the articles

"I probably will skip the articles and jump straight to the Quiz to earn money."

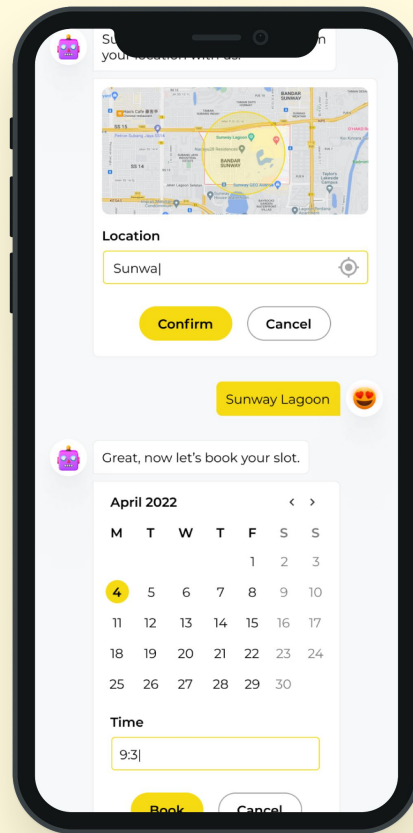

Part Five

# Final Design

## The Prototype

# AI Chatbot

Conversational banking helps banks deliver a **great customer experience** at scale. It keeps things **seamless**.

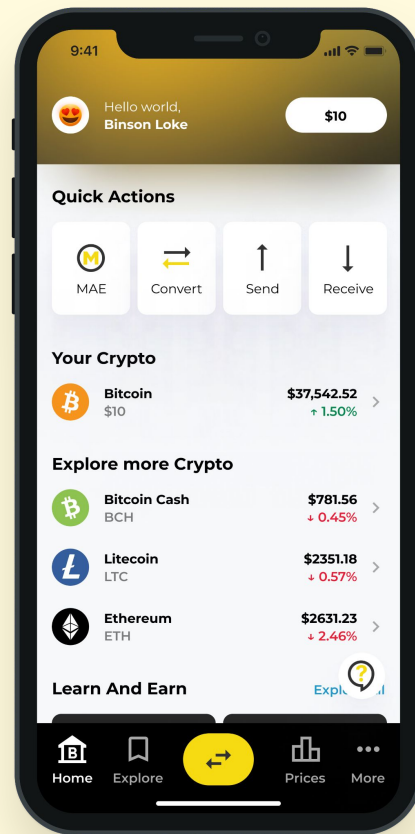

## The Prototype

# Blockchain Technology

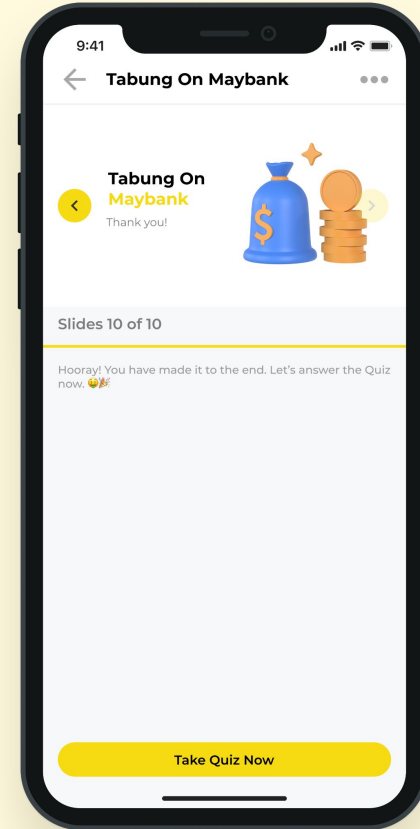

Intelligence survey found that 66% of Gen Z believe new technologies like **blockchain** will have the greatest impact on banking by 2025.

## The Prototype

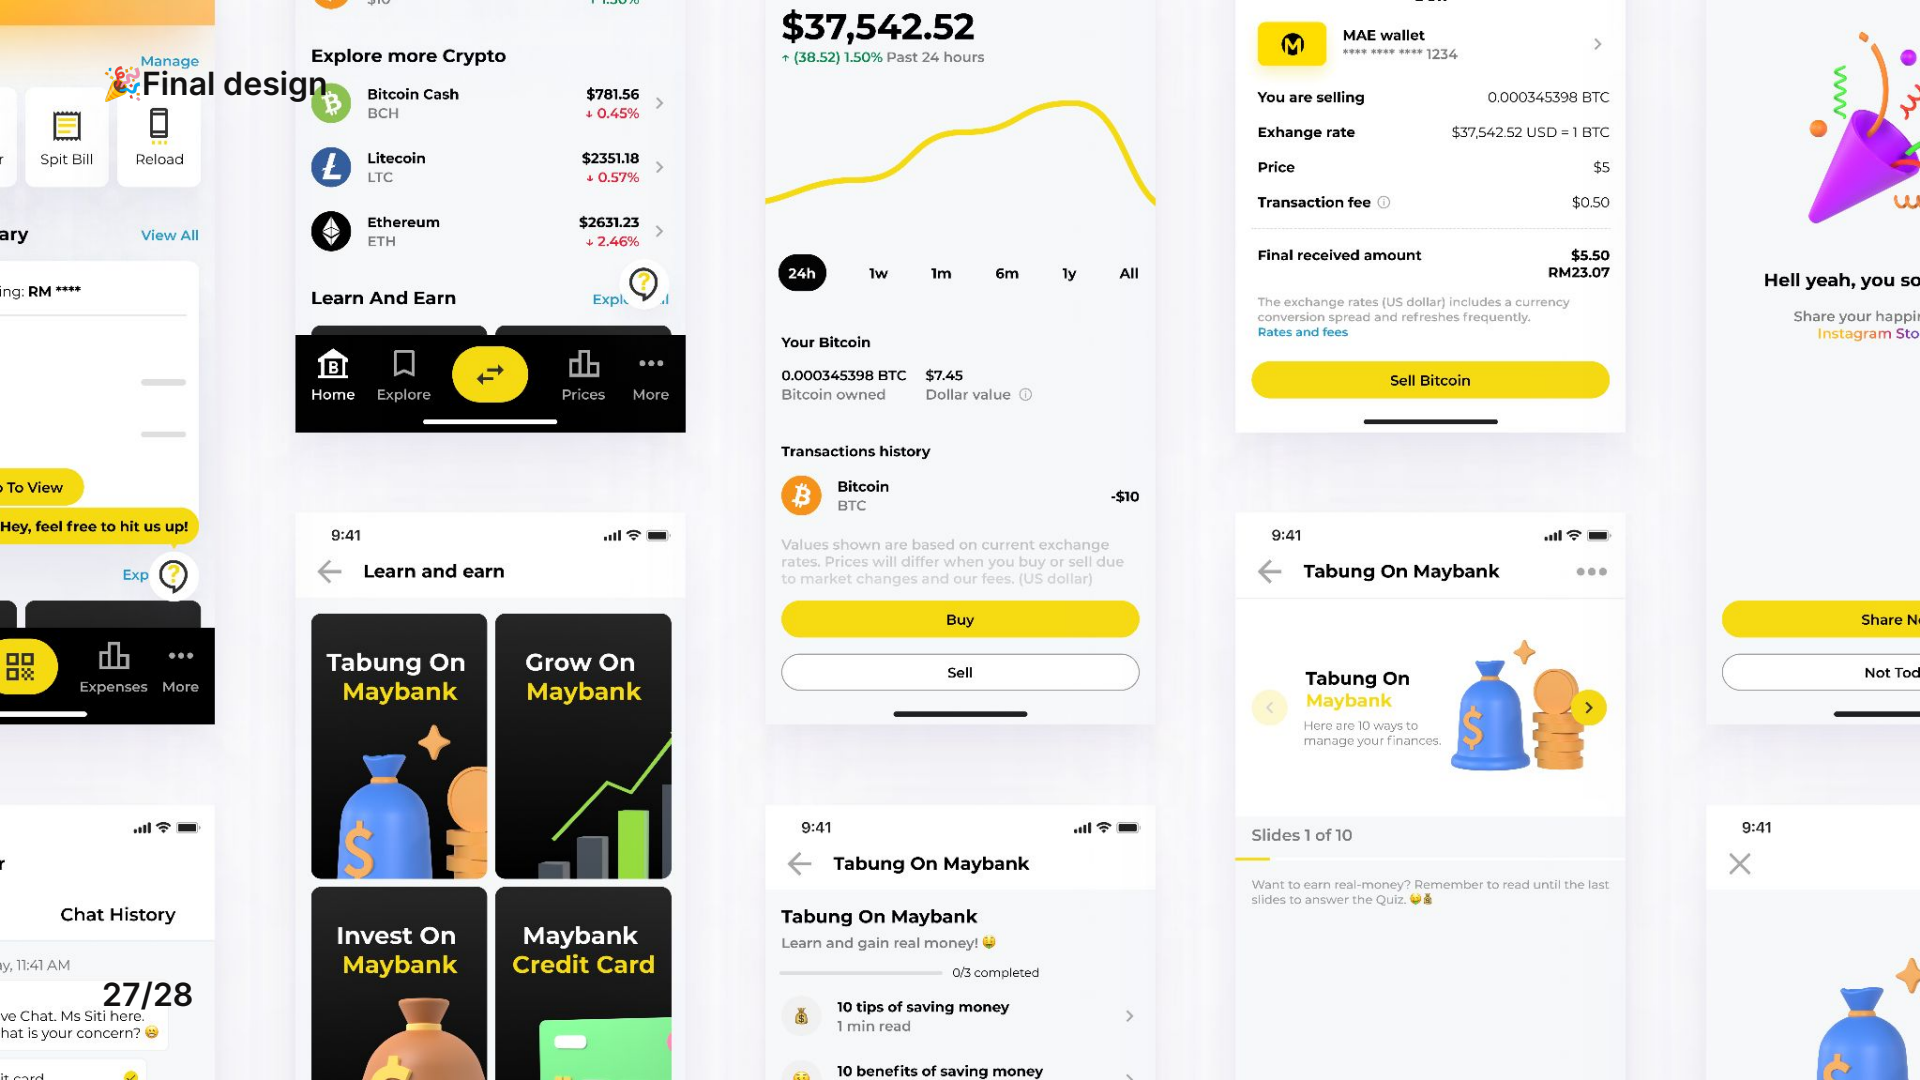

# Educational Content

Gen Z is concerned about money, so **teaching them financial literacy skills** with little **incentive** can motivate them and build relationships.
